Partnerships and technologies

Samples of software outsourcing over the borders of Czech Republic

- In the nineties we have worked for US company on the field of development and support of software for project management „TeamUP“. It was something like team leasing — they pay for time of our employees.
- TecCom — implementation and support partner for TecCom B2B e-business solution (Automotive Aftermarket) with exclusivity for Czech Republic, Slovak Republic, Poland, Belorussia, Ukraine, Romania and Bulgaria, including native speakers for these languages.
- Austria Hotels International — we are authors of complete portal solution for Hotel chain, including information system for reservations, billing and marketing activities. This project starts in 2001 and still continue.
